

HENSCHTEL'S CABIN PROTECTION FOR VW CRAFTER & MAN TGE PLATFORMS

PRODUCT INFO

THE HIGHLIGHTS

- › Particularly attractive design.
- › Dimensions: width 2028mm, height to long material carrier 1430 mm.
- › Made of steel with reinforced 3-fold corrosion protection by galvanization with cathodic dip coating (CDC) and powder coating in the standard colour dark grey - matching the factory flatbed.
- › Optional powder coating (painting) in other RAL colours is also available.
- › Integrated long material carrier with a load capacity of up to 200 kg.
- › Weight 51 kg.
- › Perforated plate for better visibility to the rear.
- › The cabin protection is screwed onto the loading bay and front side panel.
- › Due to profiles on the side, additional struts are not required on the loading bay and therefore the cabin protection takes up hardly any space on the loading bay.
- › No impairment of the lashing eyes embedded in the frame.
- › The structure ensures maximum rigidity despite the narrow shape.
- › Additional mounting holes - e.g. for mounting work lights or equipment carriers.
- › The cabin protection can be directly mounted to the vehicle - the platform does not have to be disassembled.

Tip: Loads that are longer than the platform length can be placed at an angle for transport.

THE HENSCHEL CABIN PROTECTION
FOR VW CRAFTER & MAN TGE PLATFORMS
PRODUCT INFO**SCOPE OF DELIVERY**

- › Ready-to-install cabin protection
- › Material for mounting on the platform
